DAY ONE FORMULA

Species - Specific for
Whitetail , Mule Deer & Elk
"Better Than Mother's Milk"

FEEDING DIRECTIONS: WHITE-TAILED DEER:

- Fawns up to 1 week of age: Feed 16 oz. of formula daily, divided into 4 – 6 feeding.
- Fawns 1 week to 1 month of age: Feed 24 to 30 oz. of formula daily, divided into 4 feedings.
- Fawns 1 month to 2 months of age: Feed 30 to 35 oz. of formula daily, divided into 2 to 3 feedings.
- Fawns 2 months to weaning: Gradually decrease formula and number of feedings to approximately 15 oz. of formula once daily until fawn is fully weaned at 12 to 14 weeks of age. Provide a weaning diet and fresh clean water to the fawn.

For oral use only. These feeding directions are guidelines. As each animal is an individual, the feeding rate may be increased or decreased according to the needs of the neonate.

Feeding directions for other species can be found on our website.

W-876
NADR# 275529

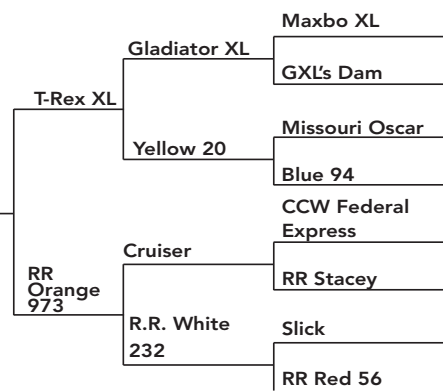

W-876 is a (GS) GEBV: -0.152, 2018 model large body bottle fed doe selling live bred to choice breeder buck on Rocky Ridge Whitetails farm. She is the dam to Milo. Only reason we are letting her go is that we have 3 offspring's from her that are SS with -0.20 or better GEBV. Here is proven doe to produce great GEBV's. Nancy and Big Momma have produced some super large sons and now adding Gunslinger and Rainbow beautiful super large frames make this a special kind of doe combined with an S and a great GEBV.

GEBV -0.275, Codon 96 SS, Scored 220 @2, "Endgame" has been used in some of the premiere farms across the country with solid success. His solid GEBV score has moved the needle for many with GEBV drag in his offspring up to a 0.19 improvement from the mother. Antler production has been consistent in his offspring with 2 year old bucks exceeding 200 inches at 2. His hybrid vigor breeding into Northern Does is evident with 60% percent of his doe fawns breeding on our farm over a multi year period. If GEBV and Codon markers are an important metric to your herd's breeding program, he is an excellent choice.

White Ears

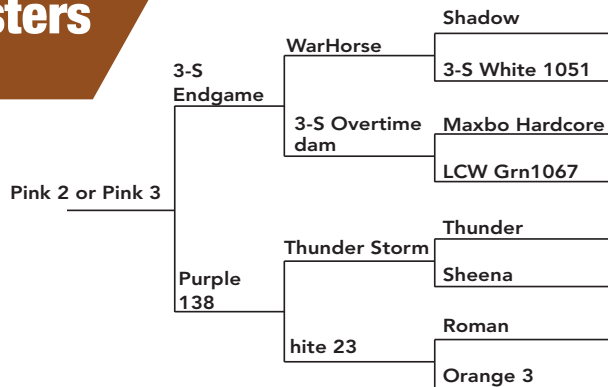

"Pretty Eyes" Purple 4, Bred Doe - Pretty Eyes is our best GEBV/Codon marked doe at Red Ridge. She will be live bred to a full Northern bred son of Quicksand/Thunderstorm/Roman's Mom, we call "White Ears" He is a typical shaped yearling with an estimated score in the 130's he is also an "SS" GEBV 0.0195 Crossing these two adds full northern blood back into the mix producing SS offspring most likely with GEBV exceeding the cutoff. Pretty Eyes has lots of maternal production. Anchored by Yellow 15, Legions mom a Giant Typical 2 year old Roman son who score 210 typical at the NADEFA competition. Pink 45 has a son who was 215 at 2. Blue 15 has offspring scoring over 240. Orange 3 had a pretty looking womb brother who was in the 180's at 2. This doe line goes all the way back to my first doe I ever bought back in the 1990's and is highly productive in the male offspring and with does consistently producing twins and trips year over year. - White Ears is pictured.

Endgame

Choice of Sisters- bred doe Pink 2 (-0.148886 GS) or Pink 3 (-0.116289 GS), ENDGAME Daughters. Can take one or both Does at two times the money. GS model girls with negative GEBV, bred to your Choice. Live covered to the buck of your choosing on our farm or AI'd to Thunder- Allstar- or Silverstar (Silverking's womb brother). Or the buyer can provide a straw of semen and we will take care of the rest. If buyer would prefer to pick up before breeding season we can accommodate that as well. These girls come out of a Thunderstorm/Roman female bred to ENDGAME. Purple 138 has no antlered sons to date. White 23 has 2, two year old bucks this year that damaged one side of their antlers but both a expressing really good frames on the good side with proper antler structure in the mainframe. (find me for pics).

Rowdy

Rowdy is sixth generation piebald at Shadow Valley Whitetails, while never breeding piebald to piebald. Rowdy is a direct son of Casanova which is half brother to SVW Bigshot. In his first year of breeding Rowdy has produced the flashiest fawns ever at SVW. His 1 year old score was 127" and was the largest one year old piebald ever at SVW. His current grown is exceptional and will be the largest 2 year old piebald ever at SVW. Rowdy took first place at teh 2024 NADeFA conference in the 1 year old typical piebald category. His symmetry is exceptional and would be a great addition to any breeding program that desires a large typical frame. Estimated 180" @ 2.

SHOCK EFFECT

IS BACK

UNDER NEW MANAGEMENT

Antler Maximizer

- Promotes increased antler growth, food utilization and body condition
- Microencapsulated probiotic for more efficient absorption
- Contains beneficial bacteria, amino acids, enzymes, vitamins, minerals and trace elements
- Available in powder

Sea-Cal Calcium

- Pharmaceutical grade coral calcium for high absorption
- Increases antler density & reduces breakage
- Helps fortify and replace lost skeletal minerals and calcium during antler growth
- Can be fed year round to entire herd
- Available in powder

Conditioner

- All the benefits of Antler Maximizer without the antler growth ingredients
- Allows you to focus on deer health without promoting additional antler growth
- Microencapsulated probiotic formula
- Designed to promote body condition, immune system support and food utilization
- Can be fed year-round to bucks, does and fawns of all ages
- Promotes better health and disease resistance
- Effective in deer, sheep, goats, and exotics (both cervid and non-cervid)

Buck Chill

- Natural supplement that addresses problematic behavior to help avoid antler damage, injuries and/or mortalities associated with breeding, handling and movement
- Provides key nutrients that promote a positive mental and physical response
- Use during transport, herd testing, AI or any other times of stress, anxiety and/or risk of injury
- Can be fed to both bucks and does
- Tested and proven effective
- Effective on Whitetail, Red Deer, Elk and other exotics

Fawn Gel

- Helps support the immune system to provide healthy start to young fawns
- Promotes a healthy digestive system and maintains a balanced pH level by supporting beneficial bacteria levels in the gut
- Each tube contains (3), five gram applications
- Available in individual tubes and 25 tube cases

Fawn Stabilizer

- Microencapsulated probiotic formula designed for use in milk replacer and/or waterer system
- Designed to help maintain beneficial bacteria levels and fawn's overall body condition and immune system
- Supports rumen health by promoting a diverse microbial population capable of more efficiently utilizing carbohydrates, proteins and fatty acids
- One pound container contains approximately 454 servings
- Feed fawns 1 scoop mixed in bottle twice daily

Colostrum Gel

- Provides newborn fawns essential colostrum to get their bodies digestive and immune systems up and running
- Especially formulated for cervids and most effective when administered within the first 12-24 hours after birth
- Each tube contains (3), five gram applications
- Available in individual tubes and 25 tube cases

Electrolyte Gel

- Formulated to promote an energy boost during times of weakness, stress, nutrient depletion and fluid loss due to diarrhea or extreme weather conditions
- This product can be used on deer of all ages
- Each tube contains 30mg (5 grams per fawn, full tube for adults)

Walk and Stalk Hunt in Eastern Cape of South Africa

HUNT OF A LIFETIME

JOHN GUNNELS

MANKAZANA SAFARIS NORTH AMERICA, LLC

SCI #1 Eastern Cape Greater Kudu with Muzzleloader

Blue Wildebeest trophy taken in 2023.

John Gunnels from Mankazana Safaris in the Eastern Cape of South Africa Donated Hunt Package. This is a "walk and stalk hunt" no vehicle hunting allowed. You are bidding on the following:

- Full day fees for One hunter, 1 x 1, for a full seven (7) days of hunting. Including \$1250 Trophy Fee credit that the winning bidder may use toward any animals that they would like to hunt.
- Extra hunting days may be booked with the extra charge of \$350/day/hunter.
- If the winning bidder upgrades to a 10 day Hunt (extra \$1,050 charge), they will then receive a \$1650 Trophy Fee Credit.

All animals taken during the Hunt will be at Current Trophy Fee Prices. Trophy Fee Prices may be subject to change from year to year. If a hunter fails to shoot the donated \$1250 Trophy Fee Credit, there will be NO refund given to the hunter. Remember that any animal wounded and not recovered is considered taken and the full Trophy Fee is due.

Donor Value : \$6,200. This Package INCLUDES : Services of a licensed professional hunter(guide), hunting vehicle and support team, pick-up and drop- off at Port Elizabeth airport, accommodations at the lodge, meals, soft drinks, liquor, local beer and wines in reasonable quantities, daily laundry service, trophy fees for the included animals, field preparation of trophies and delivery of trophies to a local taxidermist or shipping agent. Includes Value Added Tax. Arrival and departure days are FREE.

This Package DOES NOT INCLUDE : Any air travel, pre and post Safari accommodations and meals, trophy fees for animals taken in addition to those included in the package or animals wounded and lost. Hire of rifles and ammunition, gratuities to PH and camp staff. The preparation, packing, documentation, taxidermy or export of trophies from South Africa. Or all items of a personal nature. **The Safari MUST be taken by the end of the 2025 Hunting Season.** We hunt the beginning of March to the end of September. To reserve their preferred dates the winning bidder **MUST** contact John Gunnels within 60 days of the close of the auction. Failure to do so may result in their having to accept whatever dates are available. A \$500 non-refundable deposit per hunter is required to lock in your dates. The deposit **WILL BE** applied to your hunt.

Raw[®]

Frozen Scents

Making Every Hunt A Success

420 Weaver Rd, Millersburg, PA
sales@rawfrozenscents.com | www.rawfrozenscents.com

Reasons why RAW Frozen Scents outperforms other brands.

The biggest complaint among hunters who use deer urine is that it doesn't work very often. This is often because the scent is loaded with preservatives, watered down, or is starting to decompose. Another reason is from not using enough. Deer typically urinate about 6 ounces, so using only a small amount won't be as effective as using several ounces.

Frozen scent doesn't decompose like non-frozen scent.

We flash-freeze our scents immediately after collection so they stay fresh. Otherwise, non-frozen organic matter in the scent decomposes and the deer can smell this.

No preservatives added.

Deer have a keen sense of smell. They can tell the difference between preservative-laden and all-natural urine. RAW is 100% deer urine.

100% pure, no water added.

All RAW products are 100% pure. We add no water to make the scent go farther. Dilution changes the profile of scent which deer can detect.

Synchronization technology allows us to collect scent any time of year.

Working with reproduction veterinarians, we have developed a synchronization process that allows us to bring whitetail deer into heat any time of the year. This means the scent is always fresh.

Certified "peak" estrus with guaranteed estrogen levels of 30+ pg/mL.

Outdoor Hunting Lab research has shown that the estrogen levels of a whitetail doe at peak estrus are over 30 PG/ML. This is what you need to fire up mature bucks. We have an independent lab test every batch of RAW Peak Estrus and certify an estrogen level of 30+!

RAW Frozen Scents tested 53.2 times more effective.

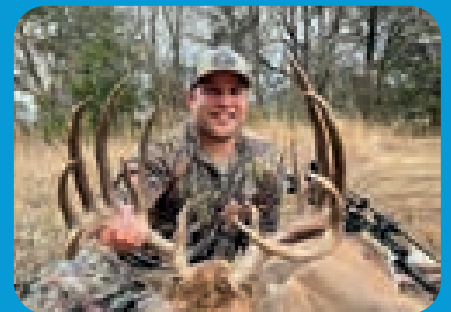

We tested RAW Frozen Scents by hanging scent-loaded wicks and letting the bucks decide. The average amount of time the bucks spent at 30+ Peak Estrus was 266 seconds, and only 5 seconds for other brands of estrus.

Proven in the field by hunters.

We surveyed hunters that used RAW Frozen Scents and 80% reported they were very satisfied... saying more mature bucks responded, were aggressive, came in quicker, and stayed longer.

"RAW Frozen Scents are the only natural scents I trust when hunting ultra-mature whitetails. By using RAW to create realistic mock-scrapes and enhance natural primary scrapes, I have noticed more daylight movement around these areas and had more big buck encounters as a result!"
- Jeff Dukart, The Deer Society

"I harvested two mature bucks in the 2021 season, one being the New Texas Typical Record taken with a compound. Using the Raw Frozen Scent Multi Buck Urine and the 30+ Peak Estrous, these two mature bucks were moving in Daylight checking active scrapes. Raw Frozen Scents are the best scents on the market that I have ever used and I have used a variety of scents. Several other companies claim to have fresh scent but don't be fooled. The proof of Raw Scents is on the ground!"
- Tarif Alkhatib
